January 2013**

**Rhode Island Family Care Community Partnerships Semi-annual Report
CY12 3rd and 4th Quarters**

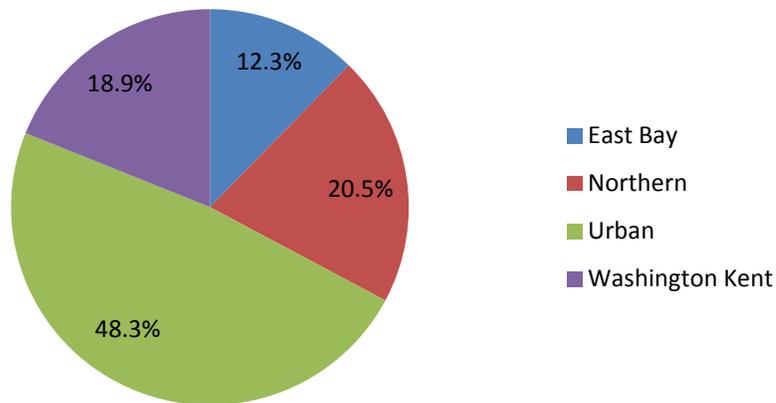

Introduction

The Rhode Island Department of Children Youth & Families presents the Rhode Island Family Care Community Partnerships semi-annual report, Calendar Year 2012 3rd and 4th Quarters. The report provides summary data on families opened to the FCCP from July 1, 2012 through December 31, 2012.

I. Characteristics of Active Families

The Family Care Community Partnerships (FCCPs) had 1330 families active during the CY12 3rd and 4th quarters (active defined as opened at least 1 day or greater during the quarter). The total number of children served by a FCCP during these 2 quarters was 2211. A “target” child is identified within a family to allow for a single family record. A family may have more than one child receiving supports and/or services in the FCCP. Figure 1 shows that the proportion of families in the respective FCCPs with the largest proportion of families in Urban Core.

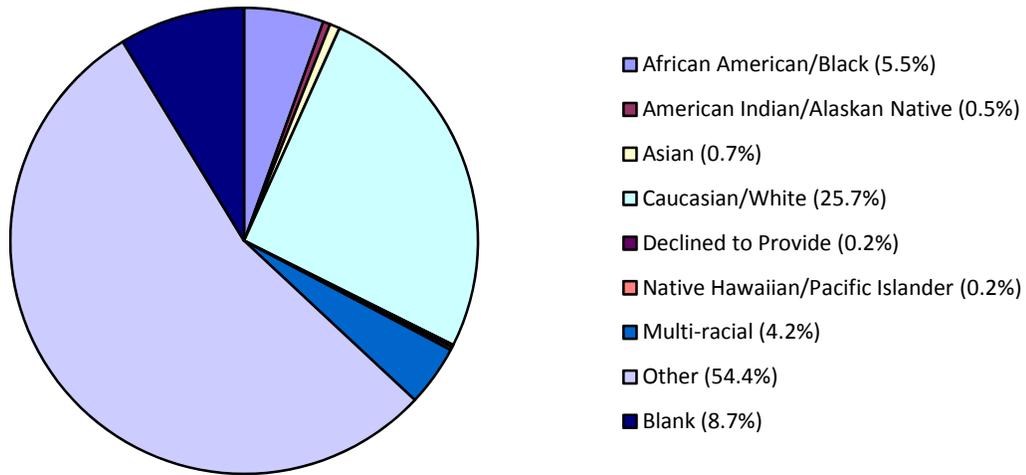

Figure 1: Percentage of Families Active by FCCP, CY12 3rd and 4th Quarters

Data Source: RI Family Information System (RIFIS)

Figure 2 shows the race of the target child. Twenty six percent are Caucasian/White followed by 6 percent African American/Black. Over 50 percent of children are identified as “Other”. Thirty two percent of the children identified as “Other” are of Hispanic origin.

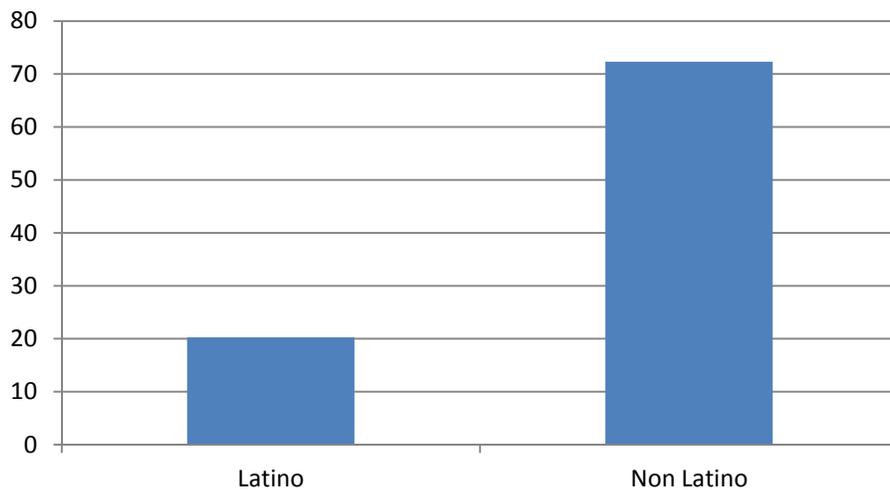

Figure 2: Race of Target Child in FCCP, CY12 3rd and 4th Quarters

Data Source: RIFIS.

Twenty percent of the active children in CY12 3rd and 4th quarters identified as being of Hispanic origin.

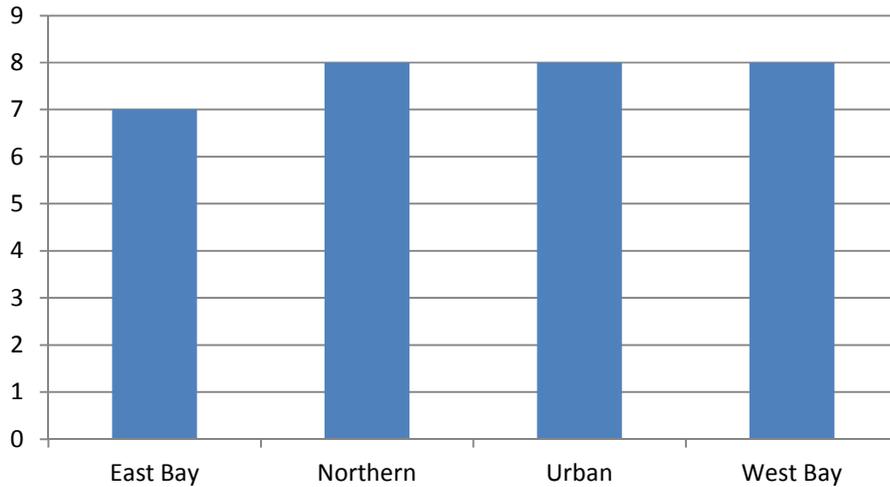

Figure 3: Hispanic Origin of Target Child in FCCP, CY12 3rd and 4th Quarters

Data Source: RIFIS. Eight percent of the 1330 active families had missing data.

Figure 4 shows the median age of the child. The median age of the child has remained consistent at age 8.

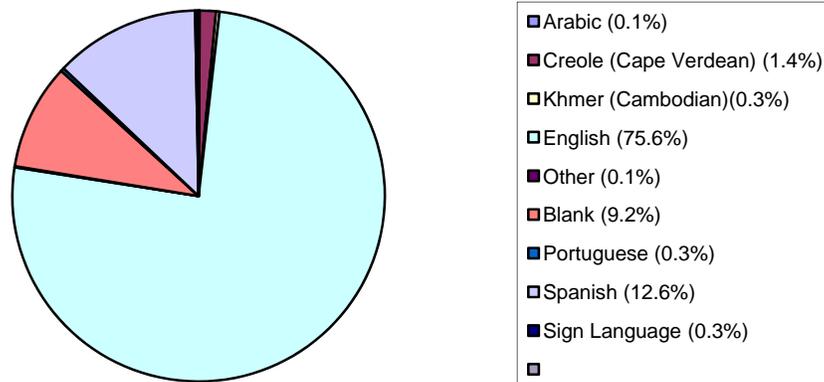

Figure 4: Median Age of Target Child in FCCP by FCCP, CY12 3rd and 4th Quarters

Data Source: RIFIS

Figure 5 shows the primary language of target children. Seventy six percent of the children speak English as their first language. The second language spoken by target children is Spanish (12.6%).

Figure 5: Primary Language of Target Child in FCCP, CY12 3rd and 4th Quarters

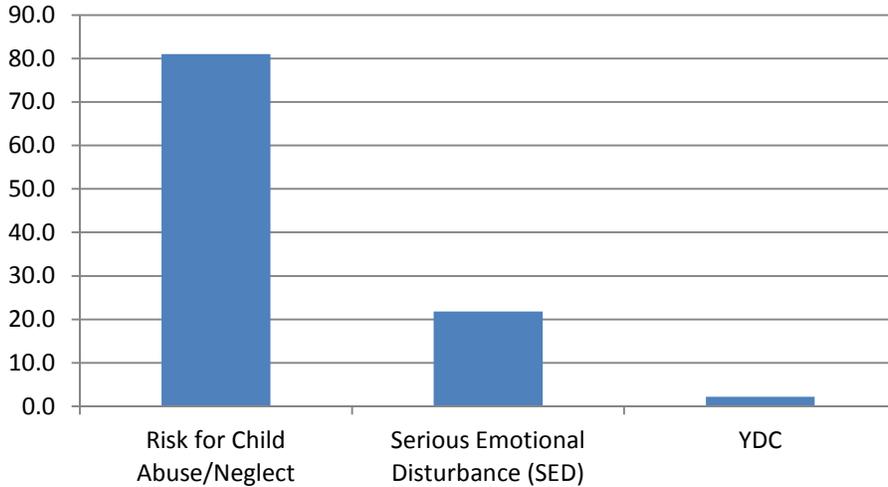

Data Source: RIFIS

III. Eligibility Criteria at Intake

There are three FCCP eligibility categories. A family may be eligible due to more than one eligibility criteria. Figure 6 shows the percent of FCCP families by their eligibility criteria. Over three-quarters of the children are at risk of child abuse or neglect.

Figure 6: Percent of FCCP Families by Eligibility Criteria, CY12 3rd and 4th Quarters

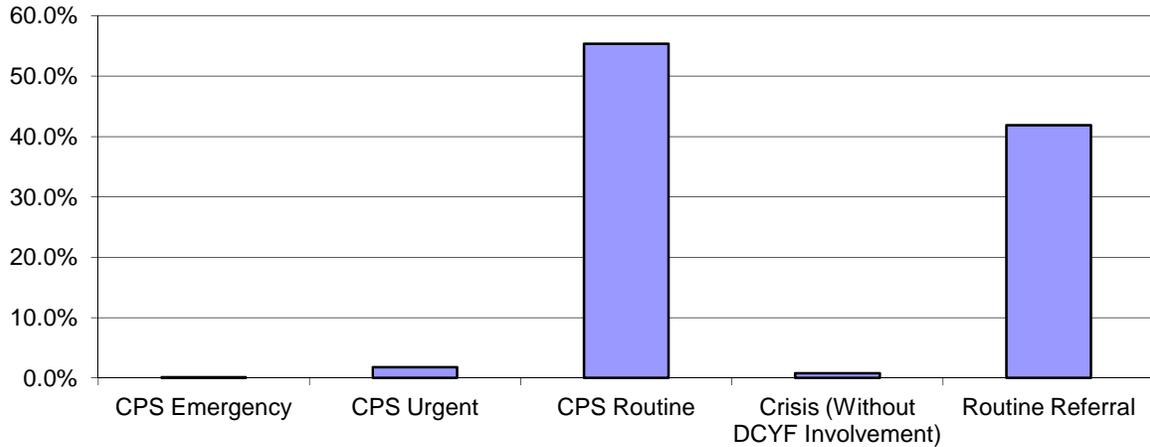

Data Source: RIFIS

FCCP Intake 1A was completed during July 1 to December 31, 2012. The numbers are not mutually exclusive because the end user can check all that apply.

IV. Response Priority: Response severity among families and face-to-face contact time by Quarter

Figure 7 shows the percentage of families broken down by their respective response priority/category at the time of intake. The greatest proportion of active families was classified as “routine” rather than emergency or urgent within response priority (response severity). This trend has been consistent across quarters since the FCCP inception.

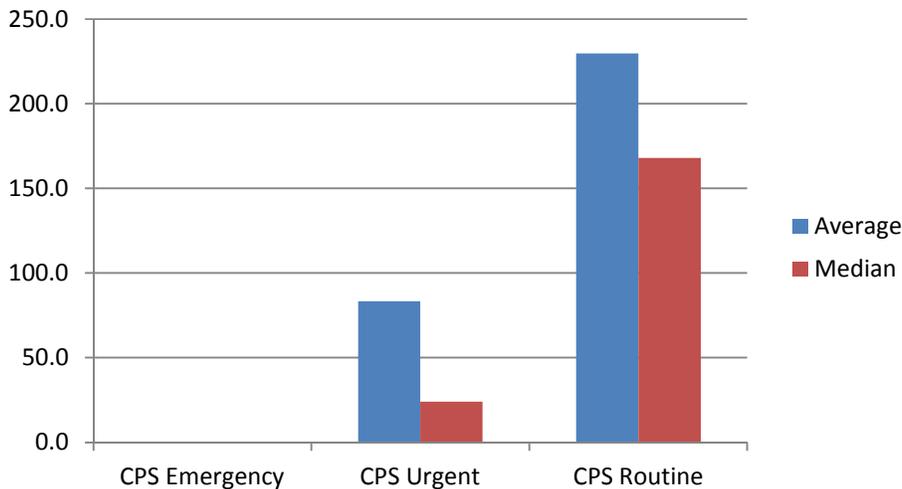

Figure 7: Percent of FCCP Families by Response Priority, CY12 3rd and 4th Quarters

Data Source: RIFIS

Each of the 3 DCYF severity-level response categories (Emergency, Urgent, and Routine) has a corresponding first face-to-face contact response time as defined in the FCCP Practice Standards. The largest proportion of CPS referrals is classified as routine. The median length of time to make a face-to-face visit with a family identified as routine has remained at 7 days from the previous two quarters. Figure 8 displays data on the adherence to the FCCP standards for first face-to-face contact with family according to severity-level response category.

Figure 8: Average & median length of time (hours) to first face to face contact with family by Response Priority, CY12 3rd and 4th Quarters

Data Source: RIFIS

V. Median and Average Length of Time in FCCP

Table 1 displays data on the median and average length of time families who transitioned from the FCCP during the two quarters. The median length of time in the third and fourth quarters of CY12 was 6.5

months. The median length of time has increased slightly from the previous two quarters of CY 2012. During the first two quarters of CY 2012, the median length of time was 6 months. The data is based on date opened to the FCCP to FCCP close/transition.

Table 1: Median and Average Length of Time in the FCCP

	CY12 3rd and 4th Quarters (N= 690)
Median:	194.0
Average:	219.7

Data Source: RIFIS. Data based on number of families closed to FCCP during July 1 to December 31, 2012.

Table 2 shows the median and average length of time a family spends with an agency. This table only includes families that have transitioned from the FCCP.

Table 2: Median and Average Length of Time in the Agency

	CY12 3rd and 4th Quarters (N= 690)
Median:	223.0
Average:	243.6

Data Source: RIFIS. Data based on number of families closed to FCCP during July 1 to December 31, 2012.

VII. FCCP Referral Source

Table 3 displays the percent of DCYF Child Protective and Intake referrals made to the FCCPs. Consistent with previous quarters, DCYF indicated investigation remains the greatest proportion of referral source among these three referral categories.

Table 3: Percent of DCYF Referral Sources, CY12 3rd and 4th Quarters

	CY12 3rd and 4th Quarters (N=1330)
DCYF: Indicated Investigation	36.2%
DCYF: CPI Request for Services	17.6%
DCYF: Intake ISR	2.8%

Data Source: RIFIS

Table 4 lists the top 5 referral sources to the FCCP. DCYF referrals make up over half of the referrals followed by self referrals (13.8%), school (6.3%) and community mental health center (3.9%).

Table 4: Top 5 Referral Sources, CY12 3rd and 4th Quarters

	CY12 3rd and 4th Quarters (N=1330)
DCYF: Indicated Investigation	36.2%
DCYF: CPI Request for Services	17.6%
Self Referral	13.8%
School System or Education Agency	6.3%
Community Mental Health Center	3.9%

Data Source: RIFIS

IX. Number of Team Meeting Occurrences by Quarter

Table 5 presents the number of team meeting occurrences. The table includes children/youth that were open to the FCCP for 30 days or greater as a mechanism to potentially reduce the number of children/youth who would be closed to the FCCP and have insufficient time to have a family team meeting occur.

Table 5: Number of FCCP Team Meetings, by FCCP region, CY12 3rd and 4th Quarters

	East Bay	Northern RI	Urban Core	Washington Kent	State
Number of Team Meetings	177	67	257	59	560
Child/Youth open to FCCP 30 days or greater*	151	249	582	233	1215

Data Source: RIFIS Consumer Assessment Responses by Program. * Child/Youth are those that were open to FCCP for more than 30 days. Some of the children/youth included in these numbers may have closed prior to the time a team meeting occurring. Further analysis will be conducted.

X. Outcomes

FCCP Close Reason – Differences by the Close Reason

Table 6 presents data on the FCCP close/transition reasons. The percent of families whose closed/transitioned reason was Wrap completed and goals achieved stayed the same in CY12 3rd and 4th quarters as compared to the first two quarters of CY12. Closed/transition reasons of “Unable to Contact Family”, “Family Declined Service”, and “Target child opened to DCYF and removed from home” increased during the third and fourths quarters of CY12 from the first two quarters of the same calendar year.

Table 6: Top 10 FCCP close reasons, CY12 3rd and 4th Quarters

FCCP Close Reason	CY12 3 rd and 4 th Quarters (N=690)
Team agrees Wrap goals have been met*	26.2%
Unable to contact family	18.8%
Family declined service	9.6%
Other	6.7%
Triaged and Referred Out	4.8%
Team agrees Wrap goals were not met **	3.8%
Family moved out of area	3.8%
Family withdrew without notice	3.2%
Target child opened to DCYF and remained in home	2.9%
Target child opened to DCYF and removed in home	2.8%

Data Source: RIFIS. * The family met partial/most/all goals in any of the 4 phases of Wrap. **The goals were not met in any of the 4 phases of Wrap.

Table 7 presents data on the top close reasons by referral source categories. Amongst 4 of the referral sources, the percent of families in the FCCP with a “positive” close reason of “team agrees the Wrap goals met” comprised the largest proportion of close reasons in the 3rd and 4th quarters. The exception, YDC, had almost half of their families close with a close reason of “unable to reach family.”

Table 7: Percent of FCCP Top 5 close reasons by 5 referral source categories, CY12 3rd and 4th Quarters

FCCP Close Reason	Referral Source				
	DCYF	YDC (DCYF)	Self-Referral	School	Other
(N= 690)					
Team agrees Wrap goals met	41.6%	29.4%	49.2%	66.7%	43.3%
Unable to reach family	28.8%	47.1%	17.5%	7.4%	27.6%
Family declined service	14.0%	23.5%	14.3%	11.1%	11.0%
Other	10.1%	0.0%	14.3%	7.4%	7.1%
Triaged and referred out	5.4%	0.0%	4.8%	7.4%	11.0%

Data Source: RIFIS. Data based on the number of families closed to FCCP during July 1 to December 31, 2012. "Other" is a combination of 16 referral source categories.

Table 8 presents data on FCCP top close reasons by 4 Referral Sources. Three referral sources had the largest proportion of "positive" close reason of "Team agrees wrap goals met". DCYF: CPI Request for Services had the highest proportion of "unable to reach family".

Table 8: Percent of FCCP Top 5 close reasons by 4 Referral Sources, CY12 3rd and 4th Quarters

	DCYF: Indicated Investigation	DCYF: CPI Request for Services	DCYF: Intake ISR	Self-Referral
Team agrees Wrap goals met	49.7%	30.0%	40.0%	49.2%
Unable to reach family	23.6%	40.0%	0.0%	17.5%
Family declined service	10.6%	21.1%	10.0%	14.3%
Other	11.8%	7.8%	20.0%	14.3%
Triaged and referred out	6.8%	3.3%	30.0%	4.8%

Data source: RIFIS

Table 9 presents data on families with a close reason reported as "opened to DCYF". Child opened to DCYF refers to opening to DCYF Family Service Unit or DCYF juvenile probation. The number of children opening to DCYF has been rising from 4.2% in the last two quarters of CY11 and 6.8% in the first two quarters of CY12.

Table 9: Percent of FCCP families with Close Reason reported as "Opened to DCYF", CY12 3rd and 4th Quarters

	CY11 3 rd & 4 th Quarters	CY12 1 st and 2 nd Quarters	CY12 3 rd and 4 th Quarters
Child opened to DCYF	4.2%	6.8%	7.4%

Data Source: RIFIS. Data based on the number of families closed to FCCP during CY12 3rd and 4th quarters. Open to DCYF defined as to DCYF FSU or DCYF probation assigned or YDC.

A closer look at these families opening to DCYF shows that the child's median age as 7 years. Ninety four percent were at risk for child abuse/neglect. Seventy two percent of these families were referred by DCYF; 58.5% were indicated cases and 13.2% were CPI request for services referrals. Twenty three percent were previously served by a FCCP.

Seventy two percent had a NCFAS baseline and transition assessment done. There were two domains, parental capabilities (18.9%) and child well being (13.2%) where a negative change occurred from intake to transition.

XI. Functional Assessments

In addition to reasons for the family transition or closing as an outcome measure, functional assessments such as the North Carolina Family Assessment, among others, inform as to whether the family has made family functional improvement as it relates to the Wrap model approach.

Since the inception of the FCCP’s, the completion of the NCFAS has been low. The last two quarters of CY2012, however, showed an increase of 81.5% of children who were opened more than 45 days to an agency having a NCFAS baseline completed. This is up from the first two quarters of CY12 (56.9%). Sixty four percent of the children who closed/transitioned between July 1 to December 31, 2012 and were open for greater than 45 days to an agency had a baseline and transition NCFAS.

Ages & Stages and Ohio Scales

In addition to the NCFAS, the Ages and Stages Questionnaire and the Ohio Scales are two age dependent assessments whose completion rates remains low. Of those children who were open for greater than 45 days to an agency and were under the age of 5, only 11.7% had a baseline ASQ. This is down from the previous two quarters in CY2012, (16.4%). Nineteen percent of children who were open for greater than 45 days to an agency and were older than 5 had a baseline Ohio Scales Parent Rating. This percentage has decreased from the first two quarters of CY2012, (20.0%)

Table 10 provides data on the average number of days to complete the NCFAS from family opening to an agency. The FCCP standards for completing a baseline NCFAS is 45 days.

Table 10: Average Number of days for NCFAS completion, CY12 3rd and 4th Quarters

	CY12 3 rd and 4 th Quarters
Average number of days to complete NCFAS baseline	20.8

Data Source: RIFIS. Calculation is determined from the agency intake start date.

NCFAS Outcomes, CY12 3rd and 4th Quarters

A 6 point scale is used to rate families ranging from “serious problem (-3)” to “clear strength (+2)”. Table 11 shows the percent of ratings in each NCFAS domain at intake and transition. Families appear to be improving in each of the domain areas.

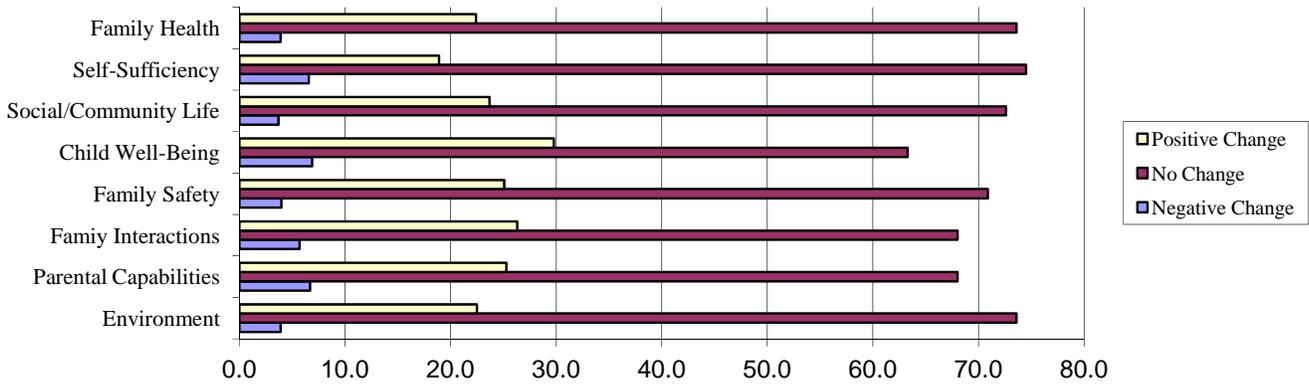

Table 11: Percent of ratings in each NCFAS domain at intake and discharge (N=336)

	Serious Problem (-3)	Moderate Problem (-2)	Mild Problem (-1)	Baseline/Adequate (0)	Mild Strength (+1)	Clear Strength (+2)
Environment						
<i>Intake</i>	3.3	11.9	12.8	44.9	14.9	12.2
<i>Transition</i>	1.2	6.9	8.7	49.9	18.8	14.6
Parental Capabilities						
<i>Intake</i>	4.6	9.7	20.4	41.6	17.9	5.8
<i>Transition</i>	2.4	5.7	17.6	38.2	25.1	11.0
Family Interactions						
<i>Intake</i>	6.0	10.8	23.4	37.1	18.3	4.5
<i>Transition</i>	2.1	9.0	17.6	40.3	23.3	7.8
Family Safety						
<i>Intake</i>	4.9	11.2	19.8	40.7	15.2	8.2
<i>Transition</i>	1.5	5.4	13.1	46.6	20.9	12.5
Child Well-Being						
<i>Intake</i>	3.6	16.2	18.6	38.7	16.5	6.3
<i>Transition</i>	2.1	6.8	16.7	41.7	23.5	9.2
Social/Community Life						
<i>Intake</i>	0.9	5.3	18.9	55.3	13.7	5.9
<i>Transition</i>	1.2	3.9	10.8	52.6	23.1	8.4
Self-Sufficiency						
<i>Intake</i>	6.6	12.0	21.3	31.1	18.0	11.1
<i>Transition</i>	4.5	9.2	17.2	39.2	17.8	12.2
Family Health						
<i>Intake</i>	2.7	13.9	24.8	41.1	11.5	6.0
<i>Transition</i>	2.1	8.6	19.0	46.4	15.2	8.6

Data Source: RIFIS

Figure 9 shows the amount of change a family experiences from intake to transition in each of the NCFAS domains. For example, a family received a “-2” rating in the Environment domain at intake and at transition they received a “-1” rating. This change shows up as a positive change in the figure below. While a majority of the families did not experience any change from intake to transition, over two thirds of the families maintained positive scores from baseline to transition, ranging from 63.3% to 74.5%. Significant positive changes were found in all domains, ranging from 18.9 to 29.8%. A small number of families experienced negative changes in each of the domain areas, ranging from 3.7% to 6.9%.

Figure 9: Percent of Families Showing Change in NCFAS Ratings, (N=333)

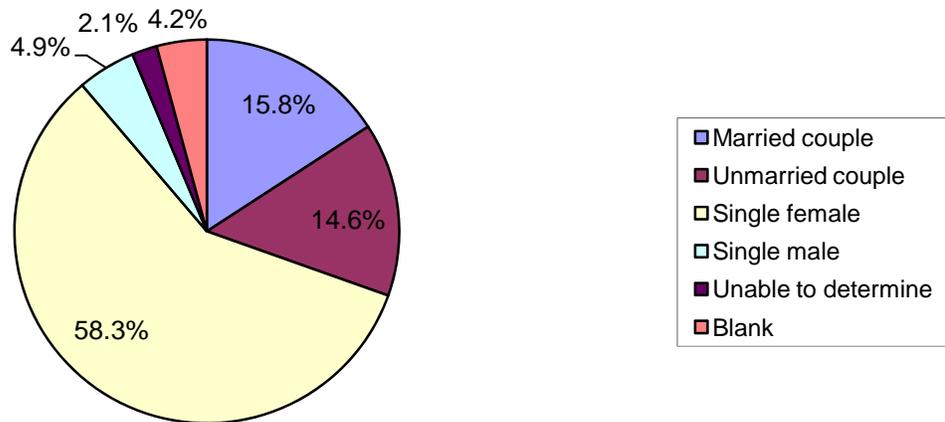

Data Source: RIFIS

XII. FCCP Intake Data: Intake Data during July 1 to December 31, 2012. Additional Child and Family Characteristics

The following figures show information taken from intakes conducted during July 1 to December 31, 2012. There were 534 intakes completed during these two quarters. The 1330 families who are reported on in this report and were open to the FCCP during CY12 1st and 2nd quarters may have had their intake to the FCCP prior to July 1, 2012 and would not be reflected in the following figures.

Figure 10 shows the family structure of the target child. Over 50 percent of the households are headed by single females.

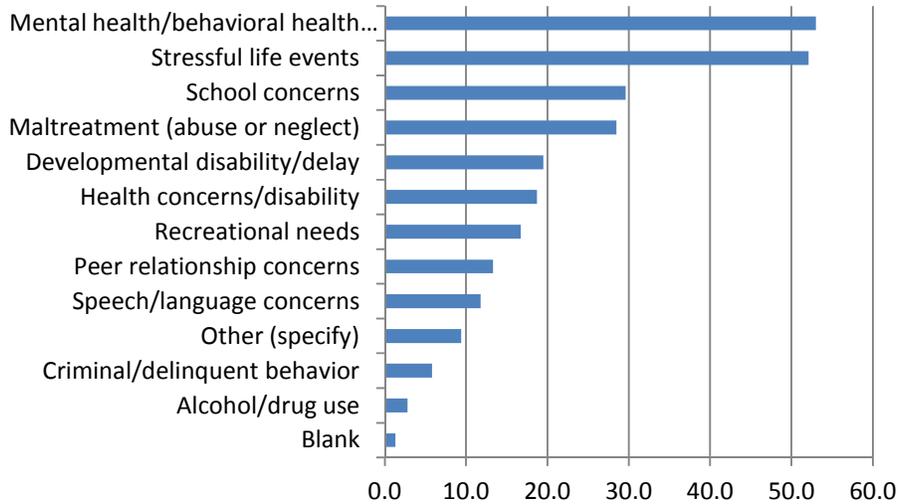

Figure 10: Family Structure of Target Child in FCCP, CY12 3rd and 4th Quarters

Data Source: RIFIS Summary of FCCP Intake Report. This is not representative of the 1330 families presented in this report because some intakes were completed prior to CY12 3rd and 4th Quarters.

Figure 11 shows the presenting concerns of the target child. Over fifty percent of the children indicated mental/behavioral health as a concern (53.0%), followed closely by stressful life events (52.1%).

Figure 11: Percent of Presenting Concerns of Target Child in FCCP, CY12 3rd and 4th Quarters

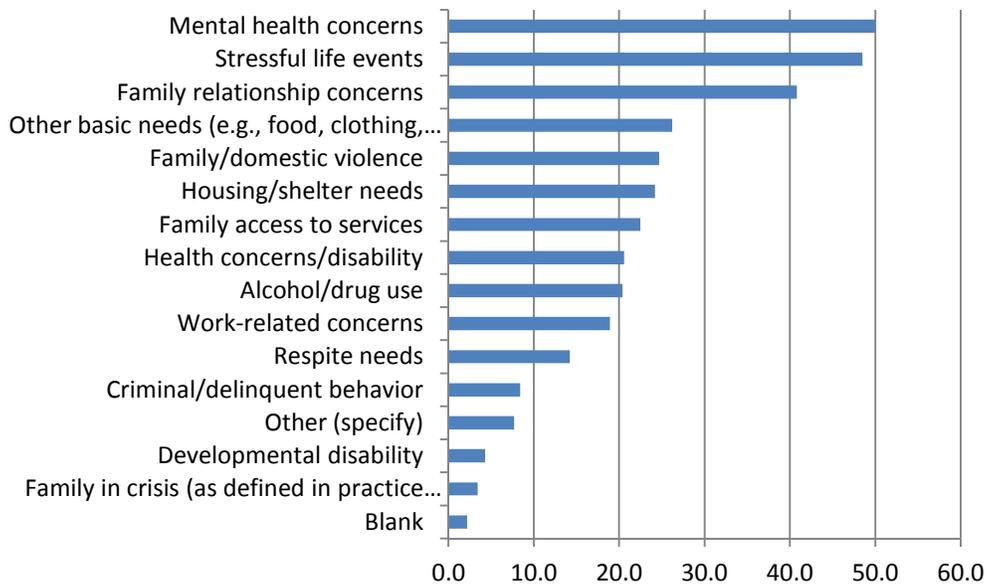

Data Source: RIFIS

FCCP Intake 1A was completed during July 1, to December 31, 2012. The numbers are not mutually exclusive because the end user can indicate up to five presenting concerns.

Figure 12 shows the caregiver/family concerns presented at intake. Fifty percent had stressful life events, followed by 49 percent who had mental health concerns.

Figure 12: Percent of Caregiver/Family Presenting Concerns in FCCP, CY12 3rd and 4th Quarters

Data Source: RIFIS

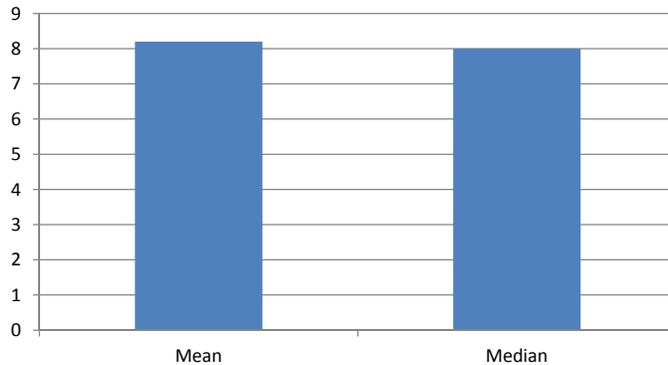

FCCP Intake 1A was completed during July 1, to December 31, 2012. The numbers are not mutually exclusive because the end user can indicate up to five presenting concerns.

XIII. Families who re-enter the FCCP

Of the 1330 families that were active from July 1 to December 31, 2012, 20.9% of the families had previously received services from a FCCP. The following figures provide a snapshot of who these families are.

Figure 13 shows the average and median age of the target child. The median age of families previously served by a FCCP is slightly higher than the median age of the active population of the last two quarters of CY12.

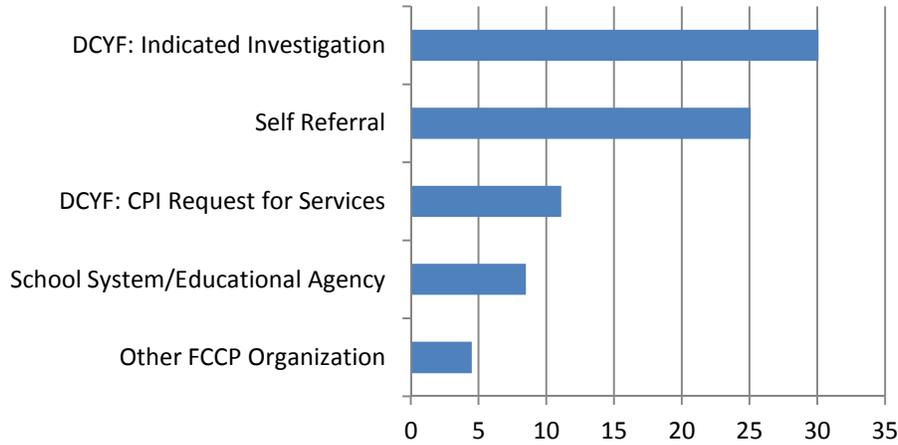

Figure 13: Median and Mean Age of Target Child, CY12 3rd and 4th Quarters

Data Source: RIFIS

Figure 14 shows the top 5 referral sources for families who re-entered the FCCP. Almost 50% of the families were referred by DCYF (Indication investigation, CPI request for services or YDC (2.5%)).

Figure 14: Top 5 Referral Sources, CY12 3rd and 4th Quarters

Data Source: RIFIS

Table 12 shows the close reasons of families previously served by a FCCP and who closed in the last six months. Thirty eight percent of families transitioned from a FCCP with a positive reason of completing Wrap. Twelve percent of families could not be contacted followed by 10% who closed for other various reasons.

Table12: Top 10 Close Reasons

FCCP Close Reasons	(N=103)
Team Agrees Wrap Completed	38.0%
Unable to Reach Family	11.7%
Other	9.7%
Family Withdrew Without Notice	7.8%
Family Declined Service	4.9%
Target Child Opened to DCYF & remained in home	4.9%
Target Child Opened to DCYF & removed from home	2.9%
Family Moved Out of Area	1.9%
Family Withdrew With Notice	1.0%
Triaged & Referred Out	1.0%

Data Source: RIFIS

Table 13 shows the NCFAS ratings from baseline to transition for families previously served by a FCCP. The overall scores indicate an improvement over time.

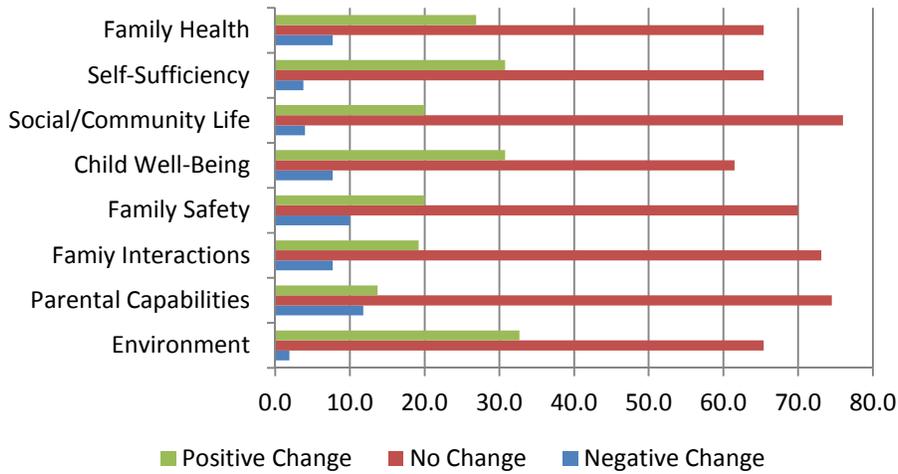

Table 13: Percent of ratings in each NCFAS domain at intake and discharge (N=54)

	Serious Problem (-3)	Moderate Problem (-2)	Mild Problem (-1)	Baseline/Adequate (0)	Mild Strength (+1)	Clear Strength (+2)
Environment						
<i>Intake</i>	7.7	21.2	13.5	38.5	11.5	7.7
<i>Transition</i>	1.9	16.7	13.0	38.9	20.4	9.3
Parental Capabilities						
<i>Intake</i>	5.9	7.8	21.6	49.0	13.7	2.0
<i>Transition</i>	5.7	7.5	20.8	47.2	17.0	1.9
Family Interactions						
<i>Intake</i>	1.9	19.2	32.7	23.1	23.1	0.0
<i>Transition</i>	0.0	18.5	22.2	33.3	24.1	1.9
Family Safety						
<i>Intake</i>	8.0	10.0	22.0	36.0	20.0	4.0
<i>Transition</i>	5.6	9.3	14.8	38.9	27.8	3.7
Child Well-Being						
<i>Intake</i>	7.7	19.2	25.0	32.7	15.4	0.0
<i>Transition</i>	3.7	13.0	27.8	33.3	22.2	0.0
Social/Community Life						
<i>Intake</i>	4.0	4.0	22.0	54.0	14.0	2.0
<i>Transition</i>	3.8	3.8	11.3	56.6	22.6	1.9
Self-Sufficiency						
<i>Intake</i>	9.6	34.6	17.3	25.0	9.6	3.8
<i>Transition</i>	3.7	20.4	20.4	37.0	14.8	3.7
Family Health						
<i>Intake</i>	1.9	21.2	36.5	26.9	13.5	0.0
<i>Transition</i>	1.9	20.4	31.5	25.9	18.5	1.9

Data Source: RIFIS

Figure 15 shows the amount of change a family experiences from intake to transition in each of the NCFAS domains. While a majority of the families did not experience any change from intake to transition, significant positive changes were found in all domains, ranging from 18.9% to 29.4%. A small number of families experienced negative changes in each of the domain areas, ranging from 5.7% to 10.0%.

Figure 15: Percent of Families Showing Change in NCFAS Ratings, (N= 52)

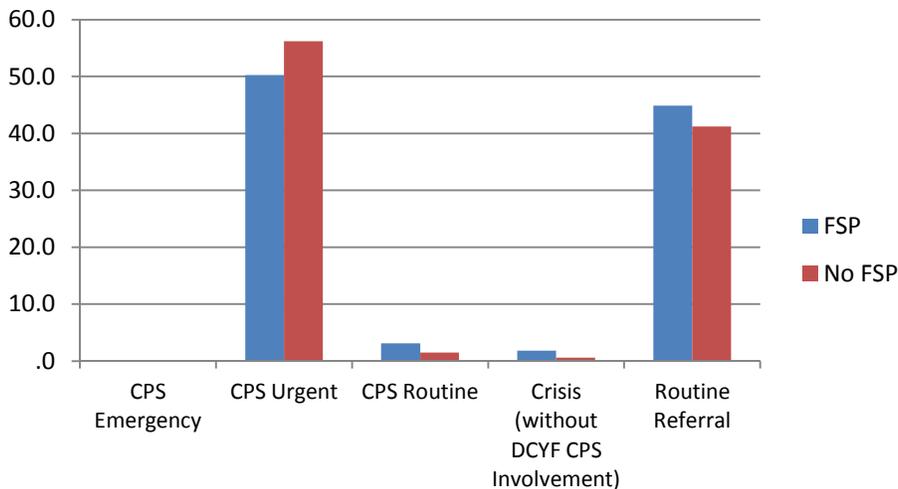

Data Source: RIFIS

XIV. Family Support Partners

During the last two quarters of 2012, 16.9 % of the active children had a Family Support Partner (FSP). This is an increase from the previous two quarters of CY12, 12.1%. The following figures/tables compare families with and without a FSP.

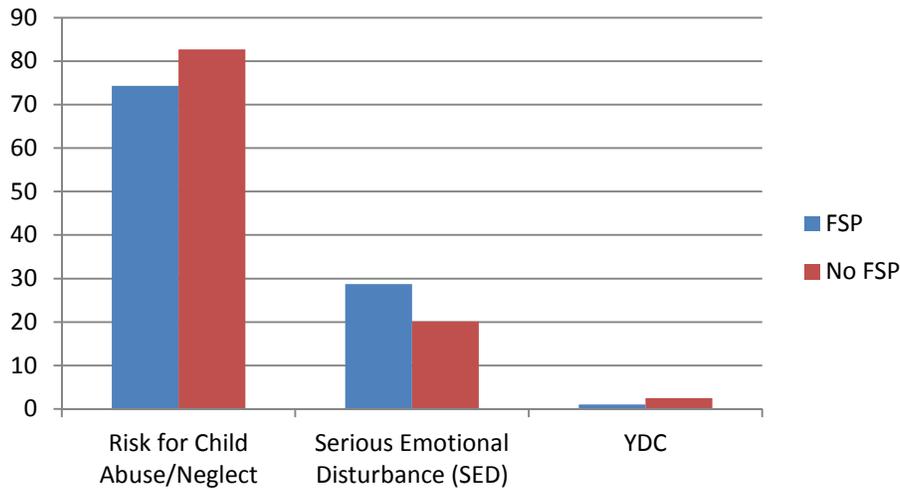

Figure 16 shows response priority by FSP. There is little difference in the response categories.

Figure 16: Response Priority by FSP, CY12 3rd and 4th Quarters

Data Source: RIFIS

Figure 17: FCCP Eligibility by FSP, CY12 3rd and 4th Quarters

Data Source: RIFIS

Table 14 shows the average and median length of time a child/family served by a FCCP. Children who worked with a FSP spent more time in the FCCP then children who did not have a FSP.

Table 14: Median and Average Length of Time in FCCP

	FSP (N=225)	No FSP (N=1105)
Median	172.0	150.0
Average	201.9	183.3

Data Source: RIFIS

Table 15 shows the close reasons for families with and without a FSP. Forty four percent of families who worked with a FSP transitioned from a FCCP with a positive reason of completing Wrap compared to 29.4% of families who did not have a FSP. Seventeen percent of families without a FSP could not be contacted and 10.5% declined to be served.

Table 15: Top 10 FCCP close reasons, CY12 3rd and 4th Quarters

FCCP Close Reason	FSP (N=88)	No FSP (N=602)
Team agrees Wrap goals were met	44.3%	29.4%
Unable to contact family	17.0%	19.1%
Family withdrew without notice	4.5%	3.0%
Family moved out of area	4.5%	3.7%
Target child opened to DCYF and removed in home	4.5%	2.5%
Family declined service	3.4%	10.5%
Triaged and referred out	2.3%	5.1%
Target child opened to DCYF and remained in home	2.3%	3.0%
Family withdrew with notice	1.1%	1.2%
Other	1.1%	7.5%

Data Source: RIFIS
